powered by eVisit

**Problem:** When you try to log in to, or create an eVisit account, you receive the error message ‘**Email has already been taken**’. This means that you have created an account on eVisit before, and need to navigate to the login page.

**Solution:** To access the login page for an existing account, click ‘**I already have an account**’, circled in the image, and located just below the [Register](#) button. This will take you to the login page, where you can login to your account or reset your password if you don’t remember it.
